

## CIS Global LLC

---

### CIS Global LLC Announcement:

CIS Global is committed to the latest technology and state of the art manufacturing facilities for its various product lines. In support of this commitment, I am pleased to announce the expansion of a new 6,000 m<sup>2</sup> production facility that will be opening in August of 2018 in the Jiangsu Province of China.

This newest CIS Global facility (capable to produce 500,000 PDU's annually) will allow for significant scale out of our growing Enlogic product lines as well as added capacity to support the expansion of our PDU and iPDU products which are rapidly taking hold in Datacenter's around the world.

With leading edge production for both Basic and Intelligent power products, and a dedicated on premise product development laboratory, we are well positioned to support and solve any PDU challenges that our customers and partners may face in support of their critical IT operations.

Best Regards,

Gerald Birin, Chief Executive Officer
